Chapter 3

Add Document Type in Workforce

Limitations

Chapter 3

Add Document Type in Workforce

For the API to function correctly a new document type needs to be added to ADP Workforce. This 'SIVI' document type is added by the Marketplace Client Support Team. Without this type the api will generate errors.

Limitations

As mentioned in the metadata mapping, the upload API only supports pdf documents. Also, only the existing SIVI codes will be mapped. Other codes will generate a 400 for the client.
