Worker Management API Guide for ADP Workforce

API Usage

Supported OData Query Options

Responses

Use Case: Retrieving Worker Count

Path useful to validate the amount of workers obtained through offsets is consistent with the total amount of workers according to the filter used.

API Usage

Method	Uniform Resource Identifier (URI)	Description
GET	/hr/v2/workers/\$count	Requests the number of workers in the organization.

Supported OData Query Options

This use case supports the Query String Option **\$filter** as defined by Open Data Protocol (OData).

Query String Option	Description	Example
\$filter	Filters a collection of resources addressed by a request URL. Only items for which the expression evaluates to true are counted.	/hr/v2/workers/\$count? \$filter=/workers/workAssignments/terminationDate ge '20170101'

Responses

You may encounter exceptions outside your common success scenarios. You must account for these exceptions during your initial development.

For more information, see [API Common Exceptions and Tips for Handling](#).

Response Code	Response Condition
200 OK	Retrieves the number of workers, according to the passed filter, if used.

Response example:

```
{
  "meta": {
    "totalNumber": "8"
  }
}
```
