Chapter 5

Worker Management API Guide for DECIDIUM

Before You Begin

Use Case Description

Supported Notifications

Personal File > Personal Information > Civil State

Personal File > Personal Information > Personal Communication

Personal File > Business Information > Business Communication

Personal File > Personal Information > Biological Data

Use Case: Synchronizing a Worker Using Notifications

Before You Begin

See All You Need to Know about Processing Notification Messages (to be done).

Use Case Description

ADP applications trigger notifications when data is updated, and your application subscribes notifications to sync-up data. For more information about ADP notifications, see [ADP Marketplace ESI - Event notifications](#).

Supported Notifications

The tables in the following sections list all supported notifications. The following describes how the tables are set-up:

- Table title describes the navigation path to the DECIDIUM screen.
- Field Name – Indicates the name of the field.
- Application Scope – Lists the canonical ID to be added to your application.

GitHub Sample Payload – Lists the file name and location where you could find sample payload on ADP's GITHUB repository.

Personal File > Personal Information > Civil State
