Chapter 2

Change highest education level.

Application Scope

Supported Actors

Chapter 3

Known issues on this API

Chapter 4

Use Case: Synchronizing Worker Highest Education using Notifications

Use Case Description

Supported Notifications

Chapter 1

About This API

Summary

KSAOC Management Application Programming Interface (API) enables users to change a worker's highest education information from ADP Enterprise HR System of Record.

Supported Product Version and Customer Base

The WorkerKSAOC Management API is available for all the employees.

Chapter 2

Change highest education level.

Summary:

The Change highest education level API is used to update the highest education level of a worker.

Use Case Description:

Refer the attached link for the use cases and the API Usage.

</events/hr/v1/worker.highest-level-education.change>

API Usage

Method	Uniform Resource Identifier (URI)	Description
POST	/events/hr/v1/worker.highest-level-education.change	Update highest education level information of a given employee.

Application Scope

The canonical URI corresponding to the pay distribution change API needs to be added in the Consumer Application Registry (CAR) for the subscription following which a user can access this API and make successful API calls.

The following canonical needs to be added to your application scope to enable this use case:

</hr/workerInformationManagement/workerManagement/associateManagement/worker.highestEducationLevel.change>

Supported Actors

ADP APIs have built-in data entitlement and access control. The response contains data based on the roleCode parameter value in an API request. For example, a person could have two roles defined in an ADP application, a practitioner who manages all employees, and an employee. Your application will use the practitioner roleCode to request the data as the practitioner.

Data Dictionary

Resources listed in the following table can be accessed in the ADP Enterprise user interface (UI) by selecting **People** --> **Personal Information** --> **Change Employee Demographics** --> **Personal Information** --> **Regulatory Information**

Schema Location	Field Name	Is Required (Y/N)?
workerHighestLevelEducationChangeEvent/events/data/transform/worker/person/highestEducationLevelCode/codeValue	Highest Education Level*	Y
events/data/output/worker/person/highestEducationLevelCode/codeValue	HIGHEST_EDUC_LVL	N
events/data/output/worker/person/highestEducationLevelCode/longName	HIGHEST_EDUC_LVL_DESCRIPTOR	N

Chapter 3

Known issues on this API

Summary:

No issues on Highest Education Change API as of now.

Chapter 4

Use Case: Synchronizing Worker Highest Education using Notifications

Use Case Description

ADP applications trigger notifications when data is updated. Your application could subscribe to interested notifications to synchronize up the data.. See the [ADP Event APIs and Event Notification Guide](#) for more information about ADP Notifications.

Supported Notifications

The following is the supported notification and the canonical IDs to be added to your ADP Marketplace Consumer Application.

For worker pay distribution change API related information please refer [Worker Highest Education](#) under API Explorer.

ADP Enterprise API Name	Application Scope
Worker Highest Education Change	/hr/workerInformationManagement/workerManagement/associateManagement/worker.highestEducationLevel.change.eventNotify.subscribe
