Chapter 4

Use Case : Modify termination date of a Work Assignment

Use Case Description

The Workers - Work Assignment Management API is used to modify a termination date of a work assignment for a specific employee.

API Usage

Link to APi Explorer: Workers - Work assignment management

Method	Uniform Resource Identifier (URI)	Description
POST	/events/hr/v1/worker.work-assignment.termination-date.change	Update termination date of a work assignment

The associate's work assignment to be modified is identified by its workAssignment/itemID

Application Scope

The canonical URI corresponding to the API needs to be added in the Consumer Application Registry (CAR) for the subscription following which a user can access this API and make successful API calls.

The following canonical needs to be added to your application scope to enable this use case:

/hr/workerInformationManagement/workerManagement/workAssignmentManagement/worker.workAssignment.terminationDate.change

Request End Point Parameters

There are no request end point parameters.

Request Header Information

There are no request header parameters, in addition to the ADP standard header parameters.

Supported OData Query Options

There is no support for OData parameters.

Sequence of interactions

The following are the steps to modify work assignment details for a specific employee.:

1. Your consumer application requests to the ADP API endpoint to POST the work assignment modify.
2. The ADP API endpoint responds to your consumer application according to the event.
3. Your consumer application requests to the ADP API endpoint to GET the response

Data Dictionary

See Appendix : Data Dictionary for Use Case : Modify termination date of a Work Assignment (POST and Notification)

All listed fields are supported for this use case.

Responses

You may encounter exceptions outside your common success scenarios. You must account for these exceptions during your initial development.

For more information, see API Common Exceptions and Tips for Handling.
