Chapter 6

Known Issues and Limitations

Issue 1: Inactive codes are not returned for the NAICS Workers Compensation CodeList API

Impacted APIs

Issue Description

Suggested Workaround

Issue 2: Error handling for invalid filter value

Impacted APIs

Issue Description

Suggested Workaround

Issue 3: For a few deductions, the deduction configuration codeList API response doesn't display the exact deduction category present in ADP Workforce Now

Impacted APIs

Issue Description

Suggested Workaround

Known Issues and Limitations

Issue 1: Inactive codes are not returned for the NAICS Workers Compensation CodeList API

Impacted APIs

For API related information please refer [WFN Custom CodeLists](#) under API Explorer.

Method	URI	roleCode Value
GET	/codelists/hr/v4/worker-management/naics-worker-compensation/wfn/1	practitioner

Issue Description

The codes retrieved using NAICS workers Compensation CodeList API doesn't include in-active codes.

Suggested Workaround

There are no workarounds available.

Issue 2: Error handling for invalid filter value

Impacted APIs

All codeList APIs are impacted.

Issue Description

When an invalid filter is passed along with the CodeList URI. For example, **?\$filter=category eq 1W6** (Category sent without quotes) then the API should return a 400 Bad Request. Instead, it's responding with a 500 Internal Server error.

Suggested Workaround

There are no workarounds available.

Issue 3: For a few deductions, the deduction configuration codeList API response doesn't display the exact deduction category present in ADP Workforce Now

Impacted APIs

Method	URI	roleCode Value
GET	/payroll/v3/deduction-configurations?\$filter=companyCode eq '94N'	practitioner

Issue Description

For a few deductions set up under category's like **MedicalFSA**, **DependentCare FSA**, and so on in ADP Workforce Now, the **deductionCategoryCode** is displayed as **Other** in the API response.

However, the following are the categories displayed exactly as configured in ADP Workforce Now:

- Deposit
- Garnishment
- Bankruptcy
- Tax Levy
- Medicare Surtax

This will be fixed in the future enhancements.

Suggested Workaround

The user can cross check the category in ADP Workforce Now, if the **deductionCategoryCode** API response is displayed as **Other**.
