## Chapter 3

# Use Case: Cancelling a Hire or a Rehire Process for a worker

## Use Case Description

This use case starts the cancel hire or rehire for a worker.

## API Usage

Method	URI	Description	GitHub Sample Response Payload
POST	/events/hr/v1/worker-hire.cancel	Cancel a hire for a worker	<a href="#">post-lifecycle-worker-hire-cancel.json</a>
POST	/events/hr/v1/worker-rehire.cancel	Cancel a rehire for a worker	<a href="#">post-lifecycle-worker-rehire-cancel.json</a>

## Application Scope

The canonical URI corresponding to the API needs to be added in the Consumer Application Registry (CAR) for the subscription following which a user can access this API and make successful API calls.

The following canonical needs to be added to your application scope to enable this use case:

**/hr/workerInformationManagement/workerManagement/lifecycleManagement/worker-hire.cancel**

**/hr/workerInformationManagement/workerManagement/lifecycleManagement/worker-rehire.cancel**

## Request End Point Parameters

There are no request end point parameters.

## Request Header Parameters

There are no request header parameters.

## Supported OData Query Options

There is no support for OData parameters.

## Sequence of interactions

The following are the steps to cancel a hire or a rehire for a worker:

1. Your consumer application requests to the ADP API endpoint to POST a hire cancel or a rehire cancel request for a worker using the associateOID or the workerID.
2. The ADP API endpoint responds to your consumer application according to the status of the request.

## Data Dictionary

[See Appendix C: Data Dictionary For POST cancel](#)

All listed fields are supported for this use case.

## Responses

You may encounter exceptions outside your common success scenarios. You must account for these exceptions during your initial development.

For more information, see [API Common Exceptions and Tips for Handling](#).
